

This paper has been prepared by the EFRAG Secretariat for discussion at a public meeting of the EFRAG FR Board. The paper does not represent the official views of EFRAG or any individual member of the EFRAG FR Board or EFRAG FR TEG. The paper is made available to enable the public to follow the discussions in the meeting. Tentative decisions are made in public and reported in EFRAG Update. EFRAG positions as approved by the EFRAG FR Board are published as comment letters, discussion or position papers or in any other form considered appropriate in the circumstances.

Technical Work Plan April 2022 - September 2022

Objective

- 1 The objective of this session is for the EFRAG FR Board to conduct its regular review of the technical work plan and advise of any necessary changes.

Background

- 2 In the past, the EFRAG FR Board requested that:
 - a) an explanation be provided for any IASB implementation projects that are classified as significant; and
 - b) the work plan be updated and presented for approval at every meeting.
- 3 Attachment 1 to this note contains the reasoning behind classifying IASB projects as significant.
- 4 At its June 2017 meeting, the EFRAG FR Board agreed that, as responses to IASB post-implementation reviews EFRAG shall collate European views and normally do not include an EFRAG position, post-implementation review responses should be finalised by EFRAG FR TEG. IASB proposed post-implementation reviews have been included in the work plan for the convenience of EFRAG FR Board members, but no action is expected from the EFRAG FR Board.
- 5 At its meeting in September 2016, the EFRAG FR Board agreed that the classification of IASB research projects as significant or for processing by written procedure should be deferred until the significance of each project emerges.

Changes to the workplan since last EFRAG FR Board review

- 6 Availability of a refund (Amendment to IFRIC 14) has been removed from the workplan as IASB decided to take the project off its work plan in their February 2022 IASB Board meeting.

Sessions to Update the EFRAG Board

- 7 The IASB projects currently active are mostly in the re-deliberation phase, following the outcome of a consultation on the ED (or RFI). The EFRAG Secretariat is actively following the process per each project and undertaking: EFRAG TEG is regularly updated on the progresses of the IASB deliberations; the IASB decisions are discussed also with the CFSS, in preparation of ASAF meetings. When appropriate, the EFRAG Secretariat undertakes selected initiatives to prepare for the next steps, such as impact analysis or similar activities. In this context, we plan to update the EFRAG Board when the IASB decisions and/or the EFRAG TEG discussions show substantial progress on a given project. Accordingly, **the attached schedule of**

updates is tentative and will be updated depending on the progresses made on each project in the coming months.

Active projects that we expect to add soon to the workplan

- 8 We expect the IASB to add a number of projects in the coming months (IFRS 16 / IFRS 10 Sale and Lease Back – Subsidiaries, PIR IFRS 9 ECL, PIR IFRS 9 Hedge Accounting, PIR IFRS 15, PIR IFRS 16). The EFRAG Secretariat is already starting planning and preparation for IFRS 9 ECL and IFRS 15, which we expect will start before the others. As usual, a project will be formally added to the workplan when the IASB will add the project on its workplan.
- 9 In addition, following the outcome of the PIR on IFRS 9 C&M, the EFRAG Secretariat is continuing to work on the issue of applying the SPPI test to loans with ESG features.

EFRAG proactive agenda 2022/2026

- 10 We expect to add new EFRAG proactive research projects in the second half of 2022. EFRAG Board will receive an update in April on the status of the IASB deliberations on the IASB workplan 2022/2026, as the decision on future new projects to be added to EFRAG workplan depend on the IASB decision on its future new projects. We tentatively plan a decision-making session in June, but the final timing will depend on the progresses from the IASB side. The session in April will also be used to collect input from EFRAG Board members on how to proceed in preparation of the decision-making.

Attachment 2

- 11 Attachment 2 to this note contains the draft technical work plan, based on the IASB's work plan at the time of preparing this paper (excluding the IFRS Taxonomy and the *IFRS for SMEs* projects) and the EFRAG research work plan. It also identifies the expected timing of written procedures.

Questions for the EFRAG FR Board

- 12 The IASB discussed the project Lease Liability in a Sale and Leaseback and decided to publish an Amendment. The project addresses a question about a sale and leaseback transaction with variable payments that do not depend on an index or rate. The IASB agreed, that it would be beneficial to amend IFRS 16 by adding subsequent measurement requirements for sale and leaseback transactions. To facilitate that change, the IASB is also proposing to specify the method a seller-lessee uses in measuring the right-of-use asset and lease liability at the date of the transaction. In the FCL EFRAG, considers that the ED provides evidence of a broader conflict of principles in IFRS 16 regarding the accounting for sales and leaseback transactions and the definition of lease payments. EFRAG therefore encouraged the IASB to consider the issue more comprehensively and in a timely manner, possibly as part of the upcoming Post-Implementation review of IFRS 16 or the IASB's project on Variable and Contingent Consideration. EFRAG stated it can accept that a temporary and faster solution to address the lack of guidance in IFRS 16, pending a more holistic review of the matter. However, EFRAG encourages the IASB to consider a simplified solution by recognising the profit attributable to the retained interest in the right-of-use asset as a non-lease liability or deferred income rather than a lease liability. The IASB decided to go forward with the proposed amendment with some minor changes. Does the EFRAG FR Board want to discuss the project in a meeting to prepare the endorsement advice?

- | |
|--|
| <p>13 In its February 2022 meeting the IASB decided to progress with its project on amending IAS 37 to align the definition of a liability with that in the Conceptual Framework and to clarify which cost to be included in measuring a liability as well as which discount rate to use when measuring the liability. The IASB board acknowledges the risk of the project having knock on effects that may make the project a significant one. The EFRAG Secretariat has tentatively proposed a project update to the EFRAG FR Board in June. Do the EFRAG FR Board want to be kept updated on the project to amend IAS 37?</p> <p>14 Does the EFRAG FR Board have any comments on the technical work plan?</p> |
|--|

Attachment 1: Basis for classifying projects as significant

Financial Instruments with Characteristics of Equity

- 15 Given the potential impact of this project, especially for financial institutions, the EFRAG FR Board decided that the EFRAG position on the IASB's Discussion Paper *Financial Instruments with Characteristics of Equity* should be considered in a public meeting rather than by written procedure.
- 16 EFRAG secretariat is monitoring the developments of the IASB project.

Primary Financial Statements

- 17 At its meeting in April 2017, the EFRAG FR Board decided that the EFRAG comment letter on the IASB's *Primary Financial Statements* project should be considered in a public meeting. The *Primary Financial Statements* project is likely to lead to significant changes to the presentation of financial performance.
- 18 EFRAG secretariat is monitoring the developments of the IASB project.

Goodwill and Impairment

- 19 The EFRAG FR Board decided to consider this project in public meeting, given the significant work undertaken by EFRAG in recent years.
- 20 EFRAG secretariat is monitoring the developments of the IASB project.

Business Combination under Common Control

- 21 The IASB is exploring ways to improve the reporting on combinations of businesses under common control. In November 2020 the IASB issued a discussion paper. EFRAG issued its DCL on 9 February and its FCL in October 2021.

Management Commentary

- 22 The IASB is revising the IFRS Practice Statement 1 *Management Commentary* (Practice Statement). At the October 2020 meeting, the Board decided the project should be classified as significant.

Dynamic risk management

- 23 The IASB has tested in 1H21 the core model with selected preparers; EFRAG took part to this field test and focused on European preparers. The topic has a direct relevant impact for European stakeholders as the continuation of use of IAS 39 (paragraphs related to the macrohedge) is also linked to the use of the carve-out. The EFRAG FR Board agreed in the October 2020 meeting to classify the project as being significant.

IASB Agenda Consultation and EFRAG research agenda consultation

- 24 The IASB has published in March 2021 a Request for Information. EFRAG is consulting jointly on the IASB Agenda and on its own proactive research agenda. The EFRAG FR Board agreed in the October 2020 meeting to classify the project as being significant.

Amendment to IAS 1 – Classification of liabilities as current or non-current

- 25 Because of diversity in practice on the classification of liabilities as current and non-current and an apparent contradiction between IAS 1 paragraph 69(d) and IAS 1 paragraph 73 the IASB published amendments to IAS 1 on January 23, 2020.
- 26 The IASB issued as part of the issues related to COVID19 Classification of Liabilities as Current or Non-current — Deferral of Effective Date (Amendment to IAS 1) deferring the effective date of the January 2020 amendments to IAS 1 by one year to annual reporting periods beginning on or after January 1, 2023.
- 27 In December 2020 and in April 2021 the classification of liabilities was discussed in the IFRS IC meeting. The IASB decided in June 2021 to add a new project on its agenda that is expected to lead to new Amendments to IAS 1, effective from 2024.
- 28 In July 2021 the EFRAG FR Board decided to classify the project as being significant. The ED was published in Nov 2021. The EFRAG DCL was issued in January 2022.

Disclosure Initiative – Targeted Standards Level Review

- 29 As a reaction on the feedback received on the IASB research project on disclosures, the IASB undertook this project in response to stakeholder demand for addressing the overall disclosure problem. In March 2021, the IASB published the Exposure Draft *Disclosure Requirements in IFRS Standards—A Pilot Approach*. In the Exposure Draft, the IASB proposes a new approach to developing disclosure requirements in individual Standards (proposed Guidance for the Board) that would address better investors' information needs and clearly explains those needs in the Standards, give greater prominence to disclosure objectives, requiring companies to apply judgement and provide information that meets the described investor information needs and minimise requirements to disclose particular items of information to help companies focus on disclosing material information only. The approach is tested on IFRS 13 *Fair Value Measurement* and IAS 19 *Employee Benefits*. EFRAG FR Board decided to qualify the project as significant based on the potential impact on standard setting.

Disclosure Initiative – Subsidiaries without Public Accountability: Disclosures

- 30 As a reaction on the feedback received on the IASB research project on disclosures, the IASB undertook this project in response to demand for a simplified and less costly approach for subsidiaries that are SME. EFRAG FR Board decided in the meeting 5 May 2021 to discuss the key aspects of this project, based on the importance and implications of the project in some European jurisdictions. In its June meeting EFRAG FR Board decided that the DCL will be approved by written procedure. Due to the summer break EFRAG TEG can only approve the DCL in its meeting mid of September. EFRAG FR Board was informed about the project in July 2021 and discussed the scope of the ED in detail. The discussion on the detailed disclosure requirements per IFRS standard will be covered by TEG.

Supplier Finance Arrangements

- 31 The IFRS IC received a submission about supplier finance arrangements. In response to that submission, the Committee published the Agenda Decision *Supply Chain Financing Arrangements—Reverse Factoring*. The IASB has been informed, however, that without targeted amendments to the current disclosure requirements, users of financial statements may be unable to obtain from financial statements some of the information they need to understand the effects of the arrangements. The IASB, therefore, decided to propose adding disclosure requirements about those arrangements to meet user needs. Based on the user interest, the EFRAG FR Board agreed in the July 2021 meeting to classify the project as being significant.

Attachment 2: Work plan March 2022 – September 2022

Legend

- Bold** = EFRAG FR Board decision point **DCL** = Draft comment letter
WP = Written procedure **FCL** = Final comment letter
DP = Discussion paper **DEA** = Draft endorsement advice
ED = Exposure draft **FEA** = Final endorsement advice
