# **EFRAG**

Research Project: Connectivity between financial and sustainability reporting information-

Agenda Paper 05-02- EFRAG SR TEG Update

EFRAG SR TEG- 23 May 2023

#### **DISCLAIMER**

The views expressed in this presentation are those of the presenter, except where indicated otherwise. EFRAG positions, as approved by the EFRAG FR Board or EFRAG SR Board are published as comment letters, discussion or position papers, or in any other form considered appropriate in the circumstances.

# Timeline

**2021** Project identified as top priority during EFRAG agenda consultation

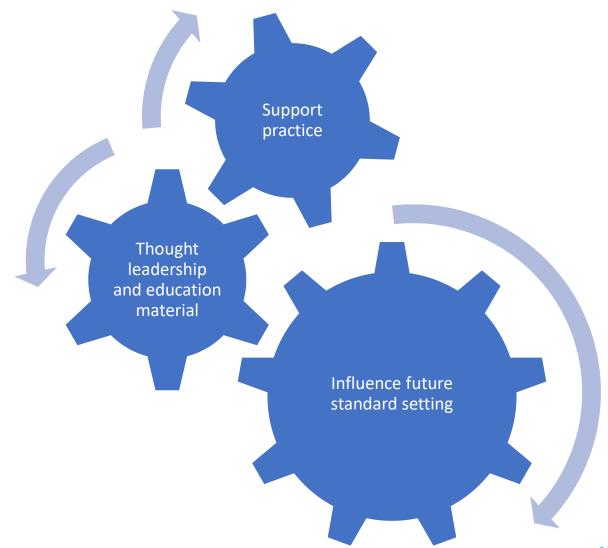

June 2022- EFRAG
FRB approved
addition of project
to proactive agenda

January 2023-EFRAG FR TEG and SR TEG discussed scope and approach of project February 2023-EFRG FRB and FR TEG approved the scope and approach of project Q2 2023

Multistakeholder connectivity advisory panel to be operational in Q2 2023

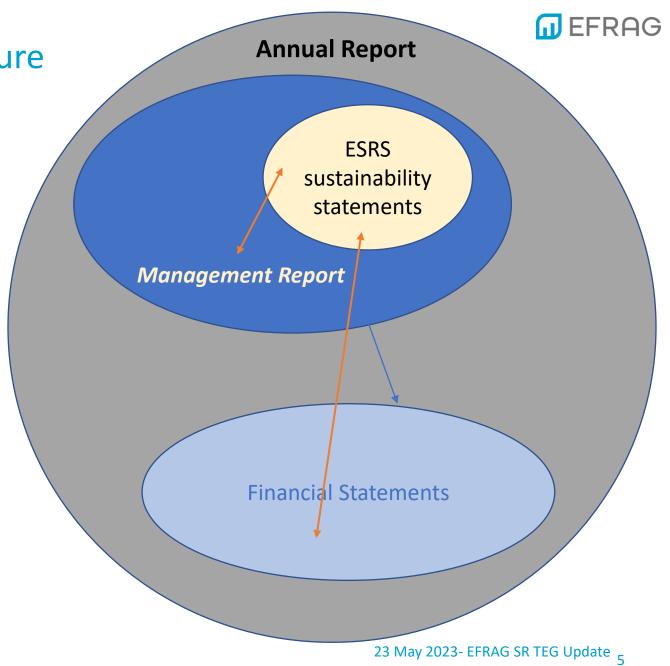

# Research objectives

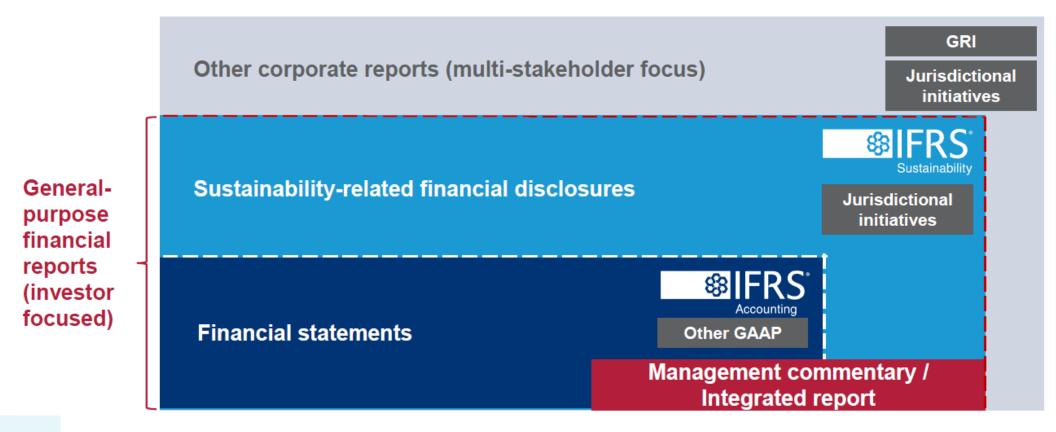

Connections: EU reporting architecture

- Mandatory application of ESRS and location of sustainability information in a dedicated section of the Management Report
- ESRS sustainability statements under 'double materiality' lens (impact materiality + financial materiality)
- Entities in scope: large undertakings (IFRS and national GAAP applicants)

# Connections/Integration in reporting: Reporting architecture described by IFRS Foundation

Source: Slides used at the April 2023 IFRS Advisory Council Meeting

# Two steps approach, start with operationalisation of connectivity

Phase 1: Operationalisation of connectivity under current conceptual FR and SR boundaries (Systematic illustration of the possible connections between FR and SR)

#### Conceptual scene setting

Set common definitions

Identify differences between FR and SR

Identify user needs

Identify anchor points

Operational techniques to foster linkage

Real world and examples

Pro-forma examples

Phase 2: Conceptualisation not restricted by current FR and SR boundaries

Explore integration of reporting

Align to work of IASB-ISSB

Scope to be defined once directions of ISSB project are clear

Scope of SR: ESRS and ISSB SR

**Scope of FR:** IFRS requirements

#### Complementarity of scope, outputs with other connectivity workstreams

- IASB project on climate-related risks in financial statements- May result in IASB issuing illustrative examples, education material, application guidance and making minor amendments to IFRS Accounting Standards
- Possible ISSB project on integration in reporting- May affect scope of Phase 2 of EFRAG project
- Other National Standard Setters work on connectivity between IASB-ISSB requirements
- ESMA study on climate-related reporting- May result in illustrative examples

# Setting the scene: conceptual boundaries of FR and SR information

- Reporting entity vs Value chain information
- Investors vs other users
- Financial control vs operational control
- Extent of application of non-monetary units of measurement
- Time horizons
- Extent of incorporation of forward-looking information
- Dynamic materiality (e.g., when sustainability risks translate into contingent liabilities)

## Setting the scene: Proposed elements of connectivity for Phase 1

#### LINKAGE AND RELATIONSHIPS

- Showing the linkage between FR and SR information including by identifying anchor points
- Showing current financial effects (without duplication) and future financial effects of sustainability risks and opportunities

#### CONSISTENCY

- where relevant, the same assumptions for FR and SR information are applied
- SR and FR make use of the same underlying data
- Basis of preparation of SR is consistent with FR
- Differences in the scope of FR and SR information are explained

### Approaches to establish connection outlined in ESRS and IFRS

- Description of relationships between different pieces of information
- Cross-referencing or incorporation by reference
- Reconciliation to financial statements information
- State consistency of underpinning assumptions

## **Next Steps**

Operational in June/July 2023

Initial focus on anchor points and user need

To advise through project life cycle

#### Updates

Update at EFRAG FR and SR TEG joint meeting, the EFRAG FRB and SRB joint meeting

Ongoing guidance by EFRAG FR TEG with advisory input from EFRAG CAP and SR Pillar

#### Deliverable/s

Phase 1 Discussion Paper for public consultation expected in 2024

Other deliverables may be considered as project evolves
